woo the twist was amazing... did not know founder of scientology could write. hilarious... ironic how there is a discussion of religion and... other "beings" in the book. makes you think there's more than nut scam crap idea to Scientology.

Enjoyed reading.

After reading the back of the book, I decided that I'd give it a try. Smart decision. I read the book at night. Not smart decision. The book covers a college professor's loss of four hours time. You'd think, "hmm...real sinister plot." You'd be wrong. At first the book seems like an average science fiction story, then we're taken inside of James Lowry's thoughts and dreams. What we see is a mushroom cloud of dimensia...or so we think. The more the story progresses, the more we see James Lowry decay. Its scary to think that the loss of four hours, something that appears so trivial, can drive a man towards insanity. Though its science fiction, the thought does cross your mind, "What if it happened to me."

Froststalker

This is a classic by one of the greats of the era. Full of twists and turns, and very well written.

Hurting forward, frenetic, toward...an unfulfilling conclusion:

Admired the prose, the style. Liked the suspense, but I just wanted more.

I did enjoy this one. Some parts read like Alice in Wonderland for me, while other parts tended to drag a little. Sometimes I found myself getting caught up in the wordiness of the story. On the whole, however, I'd say this was pretty good.
